Funny Car Dragster

All Electric!!

Up to 200 hp!!

High Capacity. Up to 480 rides per hour!!

Complete timing system!!

Safe!!

You are in control...
You race it... You stop it!!

0 to 60 in 2.5 seconds

The Funny Car Dragster,

RE Enterprises's most exciting thrill ride ever!! Not only will your customers be thrilled from screaming down the track in 2.5 seconds, you'll be thrilled as this becomes your number one park attraction.

Today there is a real demand for adrenalin pumping rides. People want a rush, they more speed and excitement. ***The Funny Car Dragster*** has it all!!

We know that no matter how exciting a ride is, if the ride is not in operation, you're not making money. As with everything we build, we do all that we can to keep the maintenance low. The electric design eliminates a huge amount of maintenance, keeping the maintenance very low for this type of ride. Ride capacity is another factor we know is important. The ***Funny Car Dragster*** operation has a very realistic ride capacity of 240 rides per hour. With a few modifications the ride capacity jumps to 480 rides per hour!! The operation is quite easy to operate and only requires 2 - 4 employees. The ***Funny Car Dragster*** proved to be a winner at its first location, **Super Speed Fun Park in Panama Beach Florida.** *We know it will be a winner at your location!!*

Some key points of **RE Enterprises' Funny Car Dragster:**

It is all electric

The race lane operates at 156 volts DC.

The return lane operates at 48 volts DC.

Up to 200 horse power

Only an electric motor could put out this kind of a demand with minimal maintenance.

We use the latest solid state motor control

Our special high performance motor control is designed specifically for our drag racing.

A low maintenance system

No need for specially trained mechanics.

Durable chassis.

Rugged and simple drive train.

Electric motors require no special tuning.

Change motor brushes once or twice a year.

Very few adjustments. Send the motor to a motor shop every other year to have it serviced.

High capacity

With our unique track design, 240 rides per hour is a conservative number. With a few additional features a capacity of 480 rides per hour is very doable.

Economical

The cost of electricity is far less than the cost of fuel, oil, and all the other costly expenses of fuel dragster. Not to mention lower maintenance.

Timing system

A fully functional Christmas tree starting light.

Our scoreboard shows the race time and the speed.

At the end of each race a time slip is printed.

150 feet in 2.5 seconds!!

You are in control... You race it... You stop it!!

The special track allows the dragster to move freely within it's own lane, yet maintains safety for the driver. The driver has control of the steering, accelerator, and manual brake. Lack of control will yield a poor time.

Safety features

- Automatic power down.
- Automatic brakes.
- Solid state motor control with sensors
- Slow return lane.
- Attendant has an emergency shut down.
- Track design

The electric design of the dragster keeps safety simple. Not only can we shut down the entire track instantly, we control the power to different areas (or zones) of the track. The main race lane is only on for a few seconds. It comes on automatically when the race is started. After a few seconds the power is shut off automatically. On the other side of the finish line the track is without power. When the dragster crosses the finish line it senses this and an automatic brake comes on. The track attendant then turns on the momentary low voltage to power the dragster to the return lane. The return lane is powered by low voltage DC and the dragster returns at a slow speed. There are several zones in the loading area that can be turned on or off as needed. This track design makes for a safe and efficient operation.

We sell two different **Funny Car Dragster** packages. The first is for those who want to build the track themselves. The other is a complete turn-key package. Please see the following page for more detailed information on these two different packages.

RE Enterprises strives to bring the amusement industry the most innovative rides. We know we have created a winner with the **Funny Car Dragster**. It has what it takes, the thrill, the excitement, the speed!! It also has the capacity, the low maintenance, the safety.. Now let us show you how the **Funny Car Dragster** will be a winner for you.

Funny Car Dragster

Funny Car Dragster Pricing

Package 1 - \$375,000.00

1. 8 electric Funny Car Dragster
2. 3 rectifiers 2 @ 156 volt DC 1 @ 48 volt DC
3. 1 timing system with Christmas tree light
4. 1 score board
5. 1 complete track design

Buyers will be responsible for all other cost including but not limited to:

1. Having all grading and ground prep completed
2. Building the track
3. Installing the barrier
4. All DC out put electrical
5. Fencing
6. 480 volt 3 phase AC electrical input / 600 amp service panel at rectifier building
7. Lighting
8. Rectifier building and staging area cover
9. Aesthetics
10. All misc. items
11. All permits

Package 2 - \$750,000.00

1. 8 electric Funny Car Dragster
2. 3 rectifiers 2 @ 156 volt DC 1 @ 48 volts DC
3. 1 timing system with Christmas tree light
4. 1 score board
5. Installation of a complete 2 lane track including:
 - a. Concrete track
 - b. Barrier
 - c. Fencing around track
 - d. DC electrical
 - e. Lighting for track
 - f. Building for rectifier
 - g. Cover for staging area
 - h. Aesthetics

Buyers will be responsible for all other cost including but not limited to:

1. Having all grading and ground prep completed
2. 480 volt 3 phase AC electrical input / 600 amp service panel at rectifier building
3. All permits
